

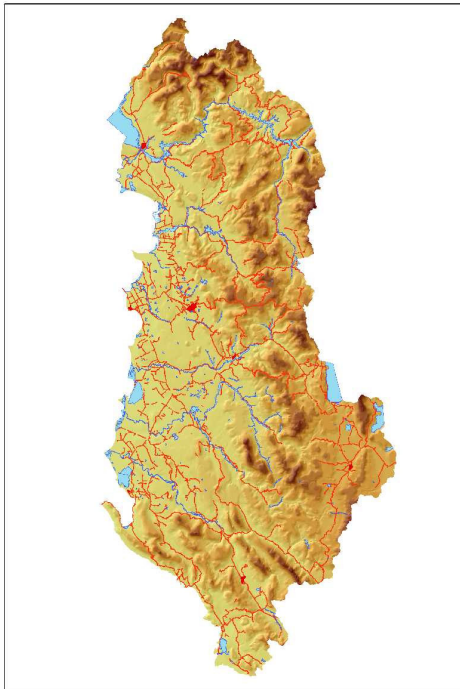

Exhibition: MedWet Database installation in Albanian services

Thanasis Partozis (EKBY), the developer of the recent version of the office application of the MedWet Database (MWD), went to a very particular trip. From 27 to 30 of October he, accompanied with ECAT's-Tirana and MedWet Coast Albania staff, visited 10 Albanian bodies to install the MWD ver. 3.0.1 covering a distance around 895 km. The trip was organized by ECAT-Tirana in the frame of the Life Third Countries ALWET project.

This exhibition constituted a complementary activity of the training provided by EKBY to several Albanian scientists, through a series of training seminars, and aimed to strengthen the use of the MWD at local level.

List of Albanian services where MDW database ver. 3.0.1 was installed.

Name
ECAT Tirana
Ministry of Environment
Institute of Environment
Museum of Natural Science
Biological Institute
Soil Institute
Hydrometeorological Institute
Regional Office of MedWet Coast Project - Vlore
Regional Environmental Agency - Vlore
Regional Environmental Agency - Elbasan
Regional Environmental Agency - Korce

The exhibition was an interactive action that falls into EKBY's efforts to spread the MedWet Inventory tools, support their use and make feasible a quantified assessment by the year of 2010.

Mr Thanasis Partozis (EKBY) and Mrs Valbona Simixhiu (ECAT-Tirana), while visiting the Hydrometeorological Institute for the MDW database installation.

Mr Thanasis Partozis (EKBY) and Mrs Albana Zotah (MedWet Coast Albania), while installing the MDW database at the Albanian Ministry of Environment.
